

# Cobra Image Router

by cobra technologies

## **Paperless is Reality. Paperless is ROI. Seamlessly scan-enable any Lotus Domino application in your organization!**

Cobra Image Router (CIR) is the premier tool to integrate Ricoh multifunction devices with the powerful routing, data store, and collaboration capabilities of Lotus Notes and Lotus Domino Document Manager. CIR communicates directly with Ricoh multifunction devices to intelligently route images into the Notes and Domino environment. CIR routing destinations are configured using a Lotus Notes user interface, and include scanning to a Domino Document Manager binder, any Lotus Notes database, Lotus Notes/Internet email addresses, websites based on Domino, and fax gateways. A user simply selects a destination from the control panel of the Ricoh multifunction device, and with a touch of a button, paper documents are transformed into searchable digital information and delivered to the Lotus environment.

### **CIR Integrates your Color or Black & White Ricoh MFP with Lotus Domino!**

#### **Why...**

- file paper in physical file cabinets when you can centrally store and manage electronic versions in Domino Document Manager?
- fax when you can eliminate old machines and transmit directly from you Ricoh multifunction device?
- photocopy when you can instantly distribute electronic copies throughout your enterprise?

CIR provides the ability to deliver electronic documents in a variety of formats with profile information, directly to end destinations within Lotus Domino without interim steps or intervention.

- Scan to Lotus Notes, Domino Document Manager, Team Workplace, network directory, share drive and more!
- Multiple file format support - PDF Image+Text, TIFF, HTML, RTF, TXT, XLS, dBASE
- Centrally administer and control multiple scanning devices from a single Notes database
- Data input/pre-scan indexing at the point of scan
- On the fly OCR, Barcode Recognition, and Image Enhancement

CIR is available for a  
NO COST trial period.
